

**AKW Apparate + Verfahren GmbH**, is a medium-size engineering, process design and equipment supply company, in private ownership.

As a recognized, internationally oriented specialist in process engineering, equipment and plant design, we offer our customers unique and customer oriented solutions for more than fifty years.

We develop and implement processes and plants with focus in wet-chemical treatment of ores and minerals, with applications ranging from the chemical industry to environmental protection and recycling technique.

The commitment of our employees, an established Know-How, a high motivation and a constantly high standard in quality and service are the principles of our success.

Because of growth in certain international markets, we are seeking experienced and qualified employees for our head office in Hirschau, **Northern Bavaria, Germany**, an m/f

## Project Manager / Project Engineer

Depending on your knowledge and your inclinations, you take on more tasks in technical project management, including process engineering or in the mechanical engineering of projects.

### Your responsibilities in detail:

- Project communication within the team and with the customer
- Process engineering and design of process flow diagrams
- Technical support for sales offers
- Calculation of aggregates / machines / plants and assemblies
- Selection and contracting of suppliers in cooperation with the purchasing department
- Creating plant layouts with site planning
- Carrying out the detailed engineering, the design calculation and the necessary constructions for aggregates, materials handling and steel construction
- Technical pre-acceptance of aggregates by suppliers
- Internal coordination of the technical assistance for mounting and for commissioning

### The requirements:

As a technician or engineer, you have experience in the fields of raw material processing, waste recycling, or design and construction of machines and plants in the process industry.

Project management experience is beneficial but not mandatory.

Experience from an international environment is highly desirable, rather on the part of customers and suppliers.

You tackle tasks quickly and in a structured manner and have the power of assertiveness. Creative, due to your negotiating skills, your team spirit and your openness towards other cultures, you can successfully realize projects both internally and towards the customer. Very good English skills complete your profile.

If you are interested in a job opportunity offering independence, challenging and versatile tasks according to your experience and inclinations, as well as a high degree of responsibility in an internationally operating medium-sized company, we look forward to hearing from you.

Applications from experienced senior engineers as well as dedicated graduates are welcome.

**You can contact Dr. Haller, from Günter Stahl GmbH, for any further questions. Please send him your complete application including your desired salary and earliest entry date via the online job portal for specialist and executive staff [www.pubstahl.de/stellenportal](http://www.pubstahl.de/stellenportal) with the code 113501 or via e-mail to [personal@akwauv.com](mailto:personal@akwauv.com).**
